Manual Input for Domain and Email Count
Email or Domain Count
1 to 2 Emails
Text
3 to 5 Emails
More Than 5 Emails
No Subscription Required
Trigger Growth Plan - 99 USD per month
Trigger Ultra Growth Plan - 199 USD per month
Click Buy Now
Redirect to Stripe Checkout
Stripe Payment Success Webhook Triggered
User Origin
AI Onboarding
Buy Mailbox Tab
Redirect to Add Leads Step
Redirect to Accounts Tab

urpose

This flow outlines how users can buy email mailboxes through two different paths in the Parakeet app—either via the **AI Onboarding Flow** or the **Buy Mailbox Tab** from the sidebar. Based on the number of mailboxes requested, a relevant **Stripe subscription tier** is triggered.

? Entry Points

1. **AI Onboarding Flow → Generate Domain and Email**
   - Appears during onboarding campaign setup.
   - Domain and email counts are **pre-filled** based on earlier inputs.
   - Default prefill: **2 domains, 2 emails per domain** → total **4 emails**.

   `**[Insert Screenshot Here: Prefilled form from AI flow]**`
2. **Sidebar → Buy Mailbox Tab**
   - Accessed from Accounts tab in sidebar navigation.
   - Domain and email count are **blank** by default.
   - Users **manually input** values.

   `**[Insert Screenshot Here: Empty form in sidebar flow]**`

? Input Fields

Field	Description	Prefilled in AI?	Required
Domain Count	Number of domains to register	Yes	Yes
Emails per Domain	Emails to generate per domain	Yes (default: 2)	Yes

- Users can modify the default values.
- **Max limits**: 50 domains × 50 emails = **2,500 emails max**

? Subscription Tiers

Total Email Count	Subscription Requirement
1–2	No subscription required
3–5	**Growth Plan** – $99/month
6+	**Ultra Growth** – $199/month

- User does **not** pick a plan manually.
- Stripe plan is determined based on calculated need.

? Purchase Flow Steps

1. User fills or sees pre-filled domain + email count.
2. System calculates total required emails.
3. Based on count, appropriate subscription tier is selected.
4. User clicks **Buy Now**.
5. Redirected to **Stripe Checkout**.
6. On payment success, system triggers a **Stripe webhook**.
7. Based on origin of flow:
   - From AI onboarding → User returns to **Add Leads** step.
   - From Buy Mailbox tab → Redirected to **Accounts Tab**.

? Stripe Processing Logic (Auto-Routed)

- If **3 ≤ total emails ≤ 5** → routed to Growth ($99/month).
- If **total emails > 5** → routed to Ultra Growth ($199/month).
